Portfolio: balochdev.com • github.com/shams992

Professional Summary: Web developer focused on building modern, responsive and reliable digital products using React, Node.js and modern web technologies.

// PROFESSIONAL EXPERIENCE

BalochDev Ongoing

Software & Digital Product Development

- Contributing to the development of modern web applications, digital tooling, and cultural products.
- Collaborating on frontend architecture, reusable component systems, and scalable UI designs.
- Developing high-performance digital tools focused on regional commerce and software solutions.

Freelance Web Developer 2023 — Present

Self-Employed / Freelance

- Building custom responsive websites and modern web applications for clients and small businesses.
- Translating client requirements and wireframes into clean, performant, mobile-first web interfaces.
- Handling end-to-end delivery: frontend design, backend integrations, testing, and production hosting.

Frontend Developer 8 Months Experience

Balochistan, Pakistan

- Engineered interactive web interfaces using React.js, modern JavaScript (ES6+), and CSS frameworks.
- Integrated REST APIs and cloud services with smooth state management and fast rendering.
- Ensured cross-browser compatibility, responsive typography, and optimal user experiences across all devices.

// KEY PROJECTS

1. Baloch Export Hub React • Tailwind • Supabase

baloch-export-hub.vercel.app

- Digital platform designed to connect authentic Balochi products, local exports, and businesses with global markets.
- Built with React.js, Tailwind CSS, and Supabase database authentication and real-time backend.
- Features modern product discovery, cultural showcase categories, and production-ready performance.

2. Offline Tailor Management JavaScript • Local Storage • CSS3

Local Workflow Management System

- Dedicated offline management system for tailor shops to record customer measurements, orders, and balances.
- Zero-latency local storage architecture ensuring full operational efficiency without requiring constant internet access.
- Structured measurement records, delivery scheduling, and intuitive order status updates.
